

25 January 1963

MEMORANDUM FOR THE RECORD

1. Today I discussed the referenced report with [REDACTED]. I pointed out that we had received the memo which Mr. Bross sent to Mr. Helms, and that we weren't quite sure what might be expected of the DD/P. Pat said that he had discussed this with Mr. Bross before the memo was forwarded, and both recognized that the DD/P (and the SSA) would be limited in the action which might be taken. The objective was to impress the DD/P with the number of projects which have become delinquent in accountings. Finance also follows these cases very carefully.

2. The only conclusion drawn was that SSA would help Finance Division by exerting a little pressure on the Divisions concerned. Actually their performance is not too bad, except for [REDACTED] which has more delinquencies than all the other components together. I told Pat that we would raise the problem at the next Support Chiefs meeting, and prod [REDACTED] specifically.
